The interview of the moment.... Mathilde David!

What is your position and what are your main duties?

I am the new QHSE Coordinator, assisting Jean and Antoine on the awareness about the QHSE Philosophy in order to make it your new favourite bible. I am also working on the environmental aspect off HSE, such as the waste gestion.

What did you do before coming here?

I have been working in the REX team for 18 months as a conciliation officer in Dieppe. I was working with different local stakeholders like tourism actors, mayors etc. In other words, for the Tech team: I was going to the restaurant every day.

What do you like in your company?

The very friendly atmosphere. Sometimes I feel like I work more with friends than colleagues.

What is your best achievement since you arrived?

I guess winning the Foot Eolien as part of the girl team without coming before the competition to a single training. But to be honest, I don't deserve credit for this victory, I was just a substitute. I also participated to launch the first tourism call for projects for TRE.

Something personal about you?
