

## The interview of the moment... Inès Heintzé!

### What is your position and what are your main duties?

I am communication officer for the projects: my job is to build an attractive and consistent brand image for our future offshore wind farms, and further than this, to make them famous!

### What did you do before coming here?

I worked for one year in the international relations department of Paris City Hall, and before that I did internships in Air France and EDF.

### What do you like in your company?

Our parties (the ones we used to do and that we'll do again for sure) and people I work and share my days with!

### What is your best achievement since you arrived?

Collecting two million euros for both projects thanks to our crowdfunding campaigns in 2019.

### Something personal about you?

I have started playing the piano a few months ago... I look forward to taking classes once the lockdown is over, and who knows, being part of the reunited LEMS brothers!
